

IN THE CLAIMS:

Please delete claims 2 and 11 without prejudice and amend claims 1 and 10 as follows:

A C17
1. (Amended) A display device, comprising:

a display panel having a display surface for images and an outer side face adjacent to said display surface;

a housing containing said display panel and having an inner surface opposed to said outer side face of said display panel;

an antenna located between said outer side face of said display panel and said inner surface of said housing;

wherein said antenna includes a radiator portion provided at a predetermined distance from a conductive material portion of said display panel and/or said housing and a ground portion connected to said portions made of conductive material;

a rib formed on the outer portion of said housing so that it projects approximate vertically to said display surface of said display panel; and

a frame filling a space between said housing and said display panel wherein said antenna is sandwiched between said rib and said frame.

A2 C17
10. (Amended) A computer terminal, comprising:

a display panel having a display surface for images and an outer side face adjacent to said display surface;
